

Water Infrastructure Fund

Scoring Matrix – Industrial Water Reuse/Conservation Projects (Pilot)

Applicant:	
Project Name:	

Eligible Clean Water SRF or Drinking Water SRF Project? Yes No

Scoring Criteria:	Points Possible	Project Score
Project readiness (40 points total)		
Project design completed	10	
Applicant has control of land/property required to complete the Project	10	
All funding sources have been identified/secured in order to complete the Project	10	
Construction is reasonably expected to begin within 6 months of awarding bid	10	
Magnitude of environmental impact (gallons reused/conserved, etc.)	25	
Application supporting documentation (Preliminary Engineering Report, design/plans, technical analysis, project budget, financial statements, etc.)	20	
Project increases drought resiliency	15	
	100	

Bonus Scoring Criteria:		
Process water reclaimed and reused in industrial process	10	
Process water reused for other uses (irrigation/other nonpotable uses)	10	
Process water conserved/reduced by improved industrial/manufacturing process(es)	10	
More than 75% of funding from other sources (identify as part of application)	10	
Process reduces overall energy consumption	10	
	50
