Willis Dady	Willis Dady - GPD SITH (TH)
Willis Dady	Willis Dady - Welborn House (PSH)

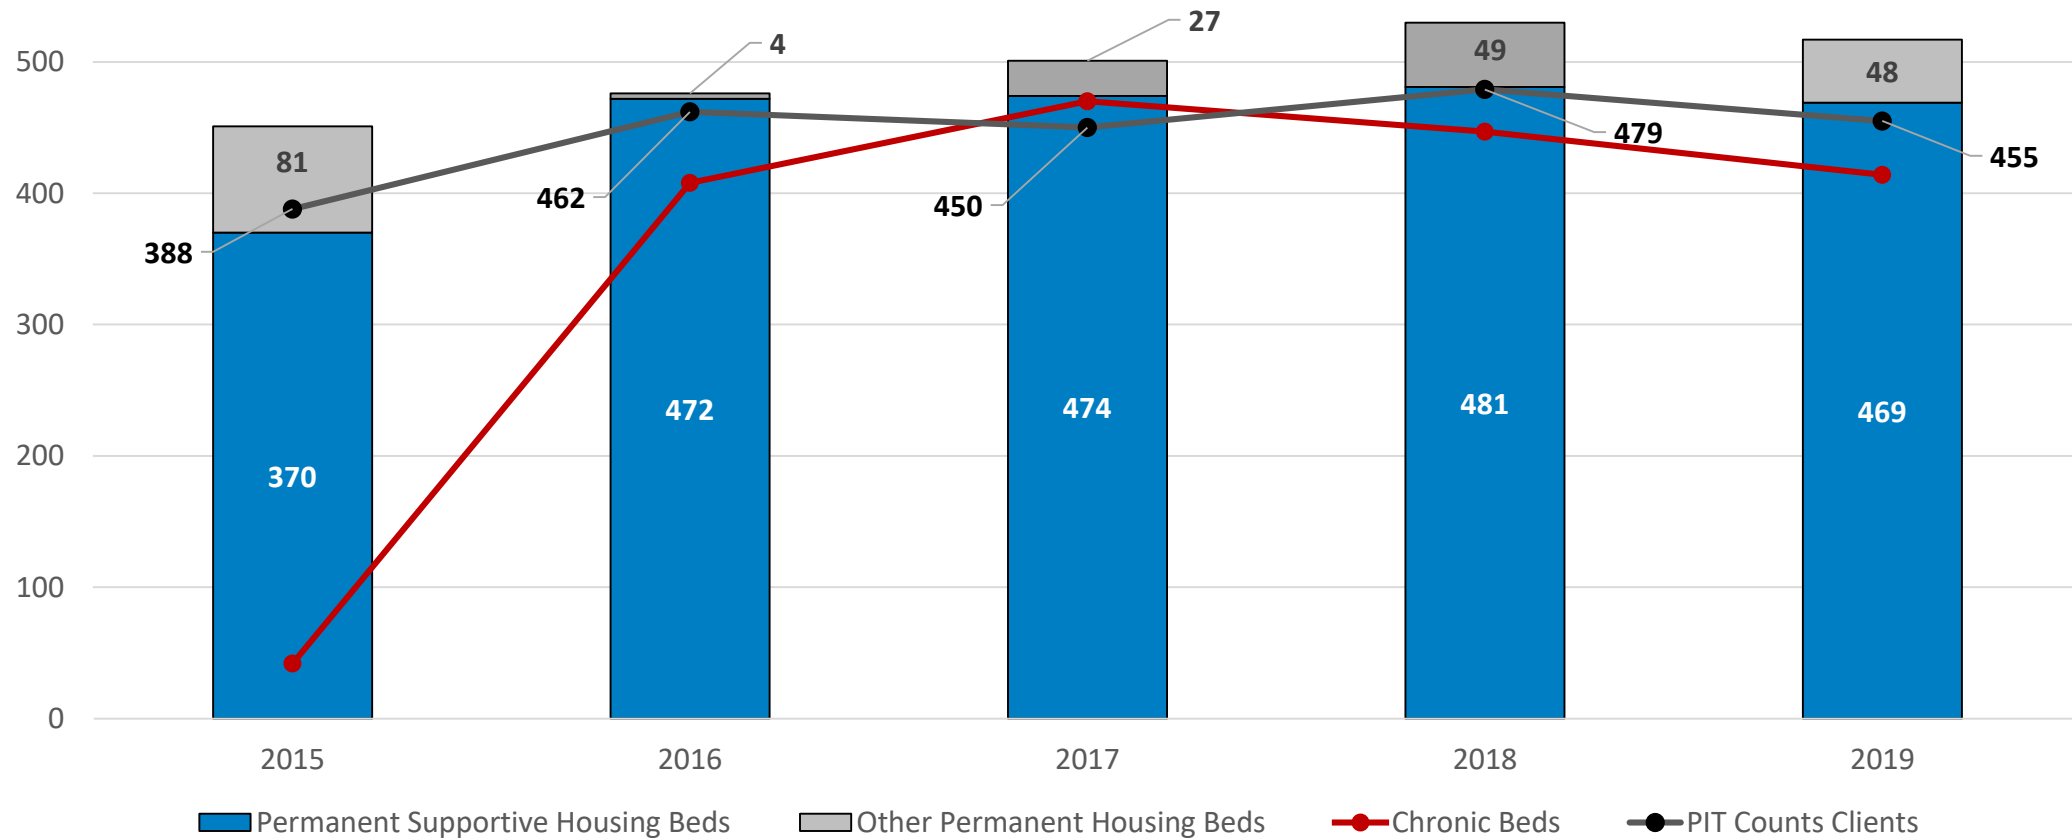

HIC: Emergency Shelter Beds

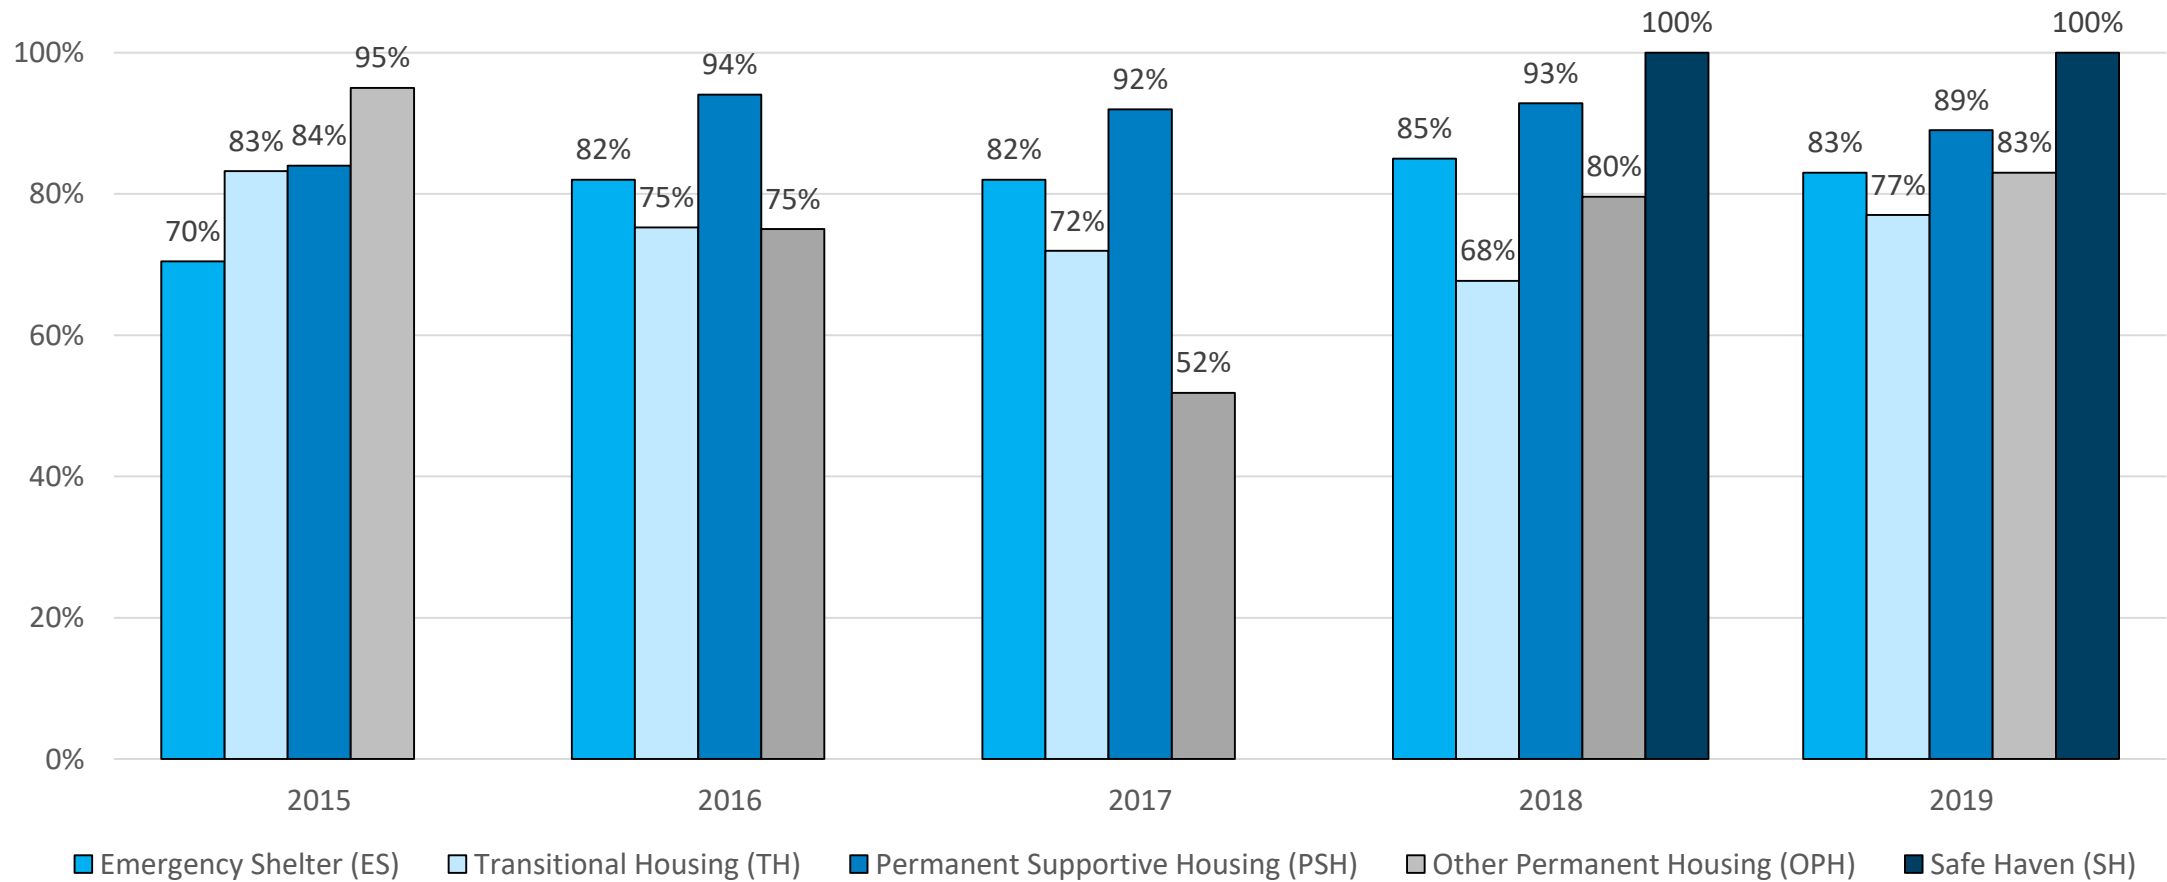

HIC: Transitional Housing Beds

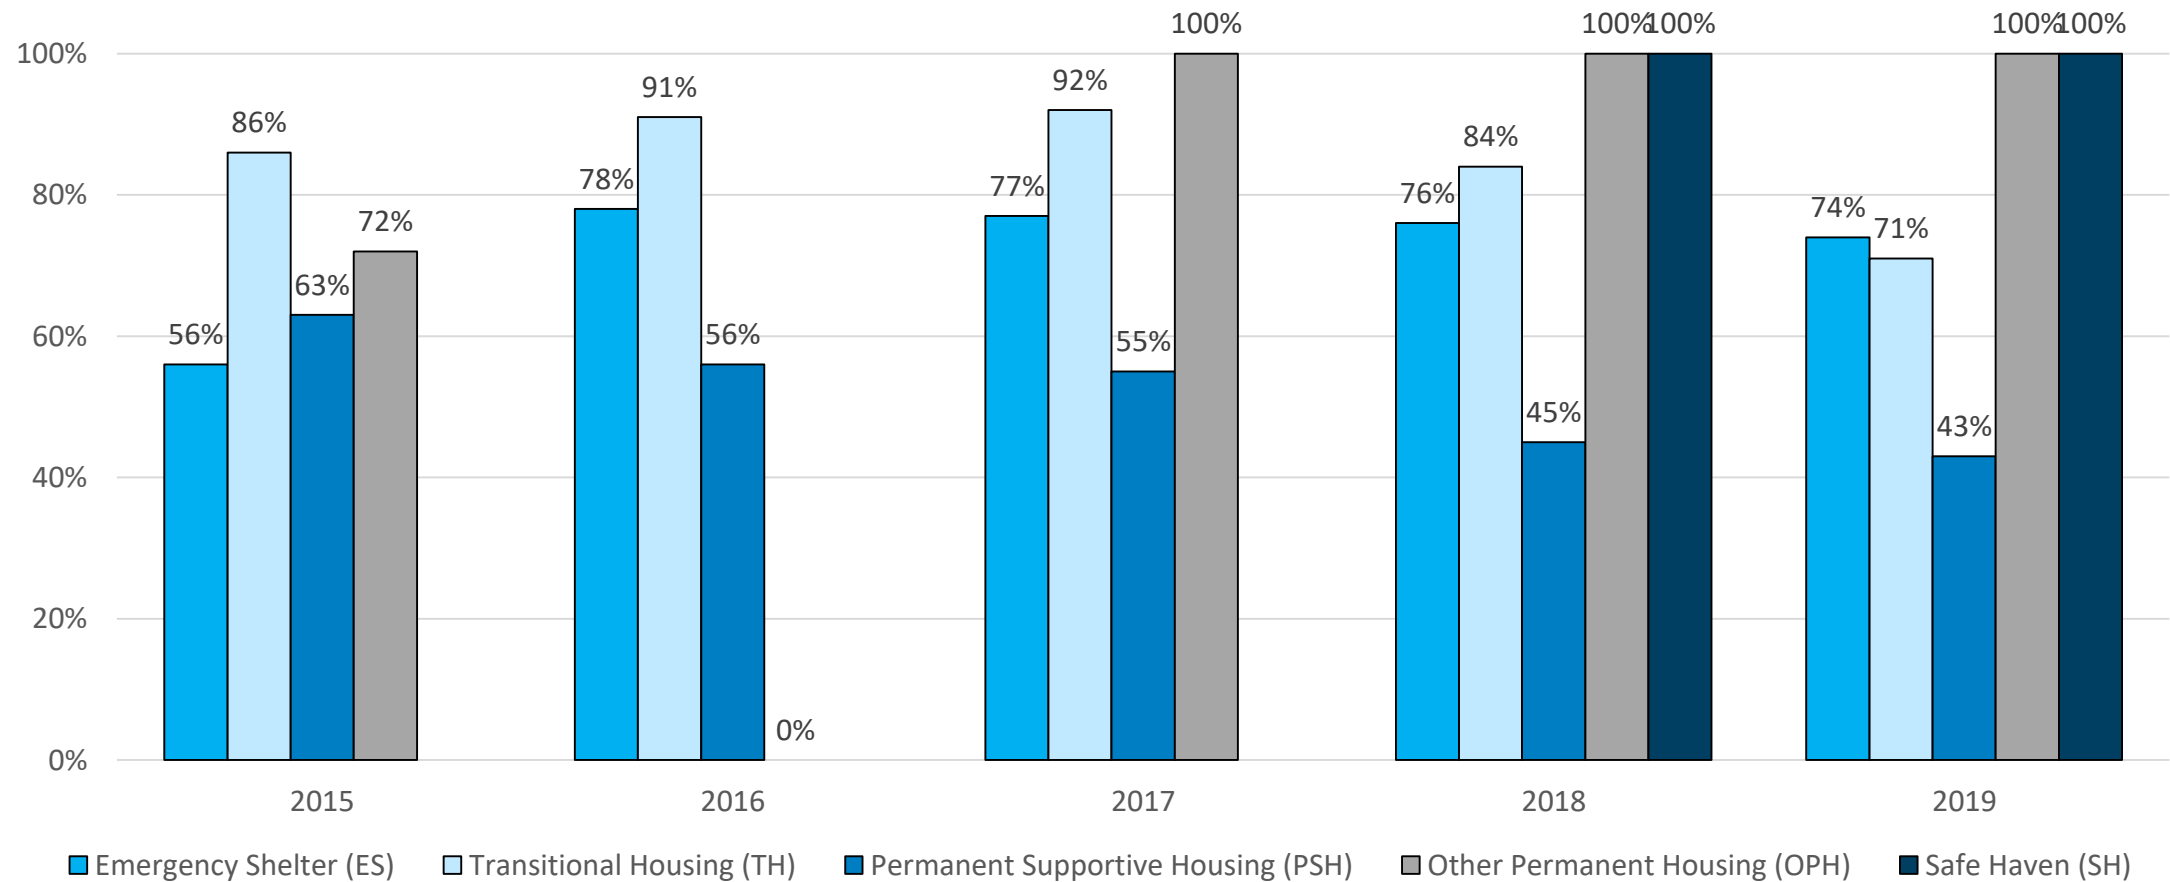

HIC: Permanent Housing Beds

Bed Utilization

HMIS Bed Coverage

Results Summary

- Overall Reduction in population for IA-501 across most project types (ES, TH, Unsheltered).
- TH bed capacity continues to decline, which is the primary factor in the decrease of the overall population.
- Street Count decreases may have been due to the one week delay in executing the count.
 - Fewer Volunteers
 - Clients receiving monthly benefits

Take Aways/Action Items

- ICH must continue to try and communicate the importance of the Point-in-Time count and Housing Inventory Count to express the impact it has on multiple funding streams.
- CoC needs to continue to increase Street Count coverage to include counties that have not previously participated.
- Continue efforts to investigate racial disparities within the CoC prioritization tool, Coordinated Entry process, and incidence of homelessness
